VERSE is the reward and utility token for the Bitcoin.com ecosystem

VERSE aims at solving crypto's biggest challenge: onboarding new users to self-custodial and decentralized tools. We believe that the custodial model goes against the core principles of crypto by restricting economic freedom and exposing people to systemic counterparty risks.

Our strategy is to encourage more users to switch to self-custodial offerings, and VERSE is a key part of that. By providing incentives for people to use our products and services, we make the transition away from centralized exchanges more appealing and accessible to all.

What makes Verse different?

VERSE is seamlessly integrated in the Bitcoin.com ecosystem and readily accessible to millions of users.

Bitcoin.com attracts and retains millions of newcomers to crypto every year via our brand and domain, our news and educational offerings, our easy-to-use products, and the recommendations of our users.

Buyback and burn

The VERSE buyback and burn mechanism is designed to encourage community participation into our suite of self-custodial tools and services.

A portion of the revenue generated by VERSE and Bitcoin.com is used to buy back VERSE tokens. These tokens are taken out of circulation and destroyed (burned), reducing the overall supply of VERSE.

Burns are visible onchain and can be monitored here.
